Nowadays, waste production is increasing. Developing technology has caused the appearance of various goods compared to the past. This has made people produce much more waste than they did before. New advances in technology have turned people into big consumers. Many people believe that this is a big challenge that has changed **their** lifestyles. However, we might not know that the things nobody needs can be used to produce electricity, heat or fuel. Changing waste to energy can be considered as one of the most helpful ways to save the resources of the earth. Because garbage can be changed directly into a liquid fuel, it can be used in cars, trucks, buses and airplanes. To do that, garbage should be collected and taken to a landfill by workers. People may be paid for voluntary garbage delivery as well. It is important to know that not all types of waste can be used to produce fuel. Some materials may give off gases in the process. Therefore, people should be informed of this danger and warned about the possible harms.

✦**True / False**

42. In the past, people produced less garbage compared to the present time. **True☐** **False☐**
43. The things nobody needs are only useful for producing heat. **True☐** **False☐**

Dictionaries which explain what words mean give a clear definition of **them**. A good dictionary also gives more information about words. For instance, it explains how they are pronounced. Usually the International Phonetic Alphabet (IPA) is used for this purpose.

There are also dictionaries which translate words into other languages. These are bilingual dictionaries. When using a dictionary to find out how to say something in another language, one has to be careful to choose the right meaning.

A word like 'right' has different meanings in English, for example, 'correct' and 'the opposite of left'. A word like 'present' may be used as an adjective, meaning 'not absent', as a noun, meaning 'gift' or as a verb, meaning 'give'. Words with different meanings exist in other languages, too. A good dictionary lists all the meanings of words to help people find the meaning that they look for. A complete dictionary also tells you about the origin of words. For example, the words 'pajamas', 'bazaar' and 'paradise' entered English from Persian.
